Proposed Studies in Intelligence Articles

1. At a recent meeting of the Editorial Board of Studies in Intelligence, a number of prospective articles were discussed. The Board agreed that an article on the Validity of Economic Statistics in the USSR and/or China would be a useful addition.
2. This could be written either as one article or as two. If you believe two articles would be more desirable, I should think that the one on the USSR should come first. This would be due in a few months.
3. If you agree with this recommendation, please let me have the name of the prospective author or authors of the articles.
